

# The Three Mother Letters

## The Three Modes of Conduct in the Universe

The *Mother Letters* א, נ, and ש represent three primordial elements<sup>1</sup>, three points of 3-D space, and three modes of conduct. Their sequence is right, left and then center; which is the natural order of reading in Hebrew (right-to-left), and then below/center which is a mixture of the previous two.

<sup>1</sup> *three primordial elements*; Fire, Water and Air are the only primordial elements; earth does not yet exist at the point of creation, it has yet to be created. Earth is created out of these three elementals, and therefore is a mixture of all three aforementioned elements.
